WELCOME

Beauty Europe UK Company Overview:

- Specializes in medical devices.
- Focus on Regenerative and Aesthetic Medicine.
- Develops innovative products to enhance client expertise.

Mission:

- Beautyeurope's mission is to provide certified, high-quality medical technologies, prioritizing patient and practitioner safety through a 'Safety First' approach.

Online Platforms:

- Visit our website: www.beautyeurope.uk and educational platform: www.aesthetic-school.beautyeurope.eu
- Designed for those seeking safe, effective products and skill development.
- Future plans to help patients find clinics, purchase specialist-recommended products, and learn about medical trends.

Masterclass Trainings

We warmly invite you to take part in our professional training sessions in autologous procedures (PRP, PRF, and Biofillers / Autologous Exosomes / Venepuncture for PRP+PRF), regularly held by our experienced trainers in various cities across the UK.

We can also arrange a dedicated, tailor-made session with a selected trainer directly at your clinic. Each course combines an in-depth theoretical presentation with intensive hands-on practice under expert supervision. To ensure the highest quality of learning, groups are limited to a maximum of 6 participants.

Our trainings are designed both for medical professionals and non-medical practitioners holding the appropriate qualifications, fully in line with the latest legal requirements.

As a certified training provider with The CPD Group, we take pride in delivering accredited education of the highest standard.

What trainings we offer?

- PRODUCTS DEMO
- PRP/PRF MASTERCLASS TRAINING
- BIOFILLER MASTERCLASS TRAINING
- **COMBINED TRAININGS (PRP/PRF/BIOFILLER)** BESTSELLER
- AUTOLOGOUS EXOSOMES DEMO / TRAINING
- VENEPUNCTURE (FOR PRP/PRF) TRAINING

PRP & PRF Products

PRP2

PRP2 is a new-generation kit/tubes for obtaining platelet-rich plasma (PRP) with a significantly higher concentration of platelets. Unlike traditional solutions, PRP2 does not contain separating gel and ensures a more comfortable procedure (no stinging sensation), making it ideal for deep injections. The outcome is enhanced regenerative potential and superior clinical effects.

FIBRIN COMPLEX

Fibrin Complex makes it possible to obtain between 1.5 and 4 ml of platelet-rich fibrin for injection, which remains in a liquid state for up to 40 minutes. This innovative process delivers a unique SPRF+ fibrin fraction, rich in fibrinogen and growth factors, together with IPRF cellular fibrin containing CD34+ blood-derived stem cells. As a result, it enables a comprehensive rejuvenation treatment for skin showing visible signs of ageing, requiring deep remodelling, firming, and volumisation.

Indications

PRF

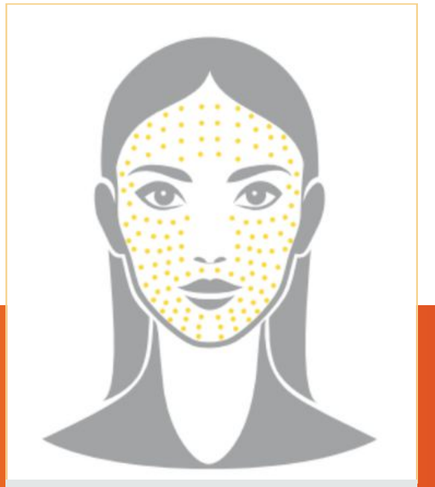
Restoration

- Restoration of skin density
- Deep wrinkles
- Tissue loss where scar filling is required (e.g. acne scars)
- Loose skin with visible signs of ageing
- Skin requiring firmness, radiance, even tone, and elasticity

Treatment Areas:

- Tear trough
- Lower eyelid
- Outer corner of the eye
- Cheek
- Jawline angle
- Area below the corners of the mouth
- Nasolabial folds

PRP



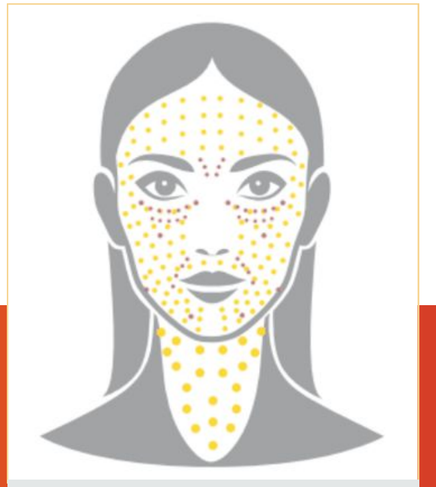
Revitalisation + Regeneration

- Skin in need of revitalisation
- Restoring radiance
- Poorly toned skin with fine lines

Treatment Areas:

- Forehead
- Temples
- Cheeks
- Perioral area
- Neck
- Décolleté
- Hands
- Scalp

PRP+PRF



Regeneration + Revitalisation + Restoration

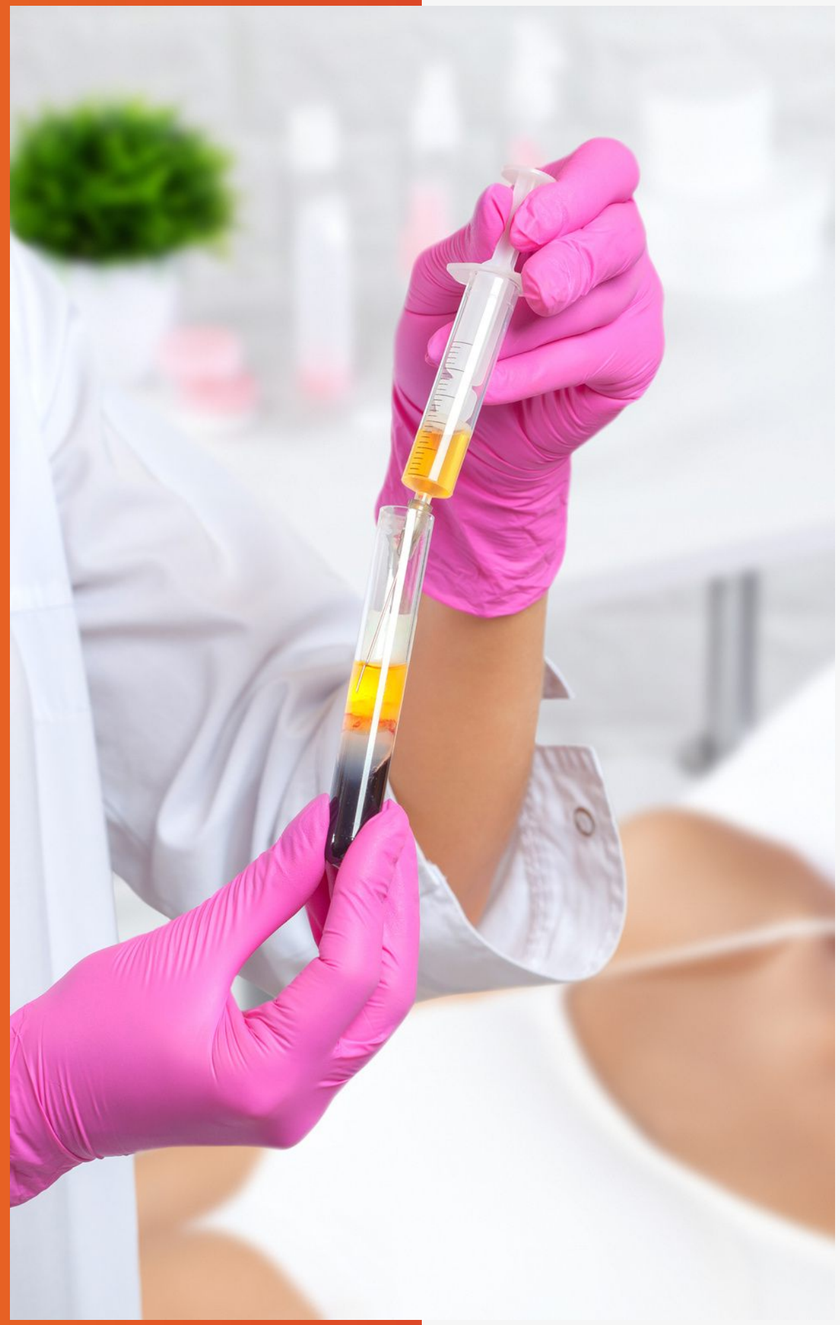
Combined treatment: comprehensive regeneration, revitalisation, and restoration of multiple areas of the body at the same time. In addition, revitalisation of the neck, décolleté, and hands helps to restore firmness and elasticity.

Biofiller

SKIN UP

Autologous filler is derived from platelet-rich plasma (PRP) and can serve as an alternative to hyaluronic acid fillers, with the added benefit of strong regenerative action. The procedure is very simple – it requires drawing and centrifuging the patient's blood, followed by heat processing of the material in a specialised Plasma Gel Maker device.

SKIN UP filler, in addition to naturally restoring lost volume, also possesses strong regenerative properties. It improves skin quality and density, evens out skin tone, and refines texture. With just a single blood collection, it is possible to obtain 5 to 20 ml of autologous filler, providing a wide range of treatment possibilities.



PRP/PRF Training

Theoretical Part:

- Platelet-rich plasma and platelet-rich fibrin in tissue regeneration.
- The role of growth factors, stem cells, and fibrin in regenerative processes.
- Indications for PRP and PRF in aesthetic medicine.
- Contraindications for autologous procedures.
- Treatment protocols and patient preparation.
- Post-treatment care and recommendations.
- Materials and instruments required for PRP and PRF preparation.

Practical Part:

- Procedures for obtaining next-generation PRP and PRF.
- Preparation and injection techniques for PRP.
- Preparation and injection techniques for PRF.
- Live demonstration by the trainer.
- Hands-on practice: each participant performs procedures under supervision.

Training details:

- Duration: approx. 4 hours.
- Each participant receives a certificate and training presentation.
- You work on your own model.

Biofiller Training

Theoretical Part:

- Protocols for obtaining SKIN UP.
- Indications for autologous procedures.
- Contraindications for autologous procedures.
- Patient preparation before the treatment.
- Post-treatment care and recommendations.
- Materials and instruments required for autologous filler preparation.
- Reconstruction vs. regeneration – how to position the treatment in your clinic?
- Basic injection techniques with the use of autologous filler.

Practical Part:

- Protocol for autologous filler preparation in practice – different homogenization techniques.
- Live demonstration performed by the trainer.
- Hands-on training: each participant performs procedures under supervision (using both needle and cannula):

– Lip augmentation and reshaping,
– Contouring and defining the cupid’s bow,
– Tear Trough correction,
– Facial volumetric treatments: modelling of cheeks, chin, nose, earlobes, jawline, and hands.

Training details:

- Duration: approx. 3 hours.
- Each participant receives a certificate and training presentation.
- You work on your own model.

Autologous Exosomes Training

Theoretical Part:

- Biology and classification of extracellular vesicles and exosomes
- Differences between exosomes, microvesicles, and apoptotic bodies
- Mechanisms of action of platelet-derived exosomes (PTL-EXO)
- Autologous vs allogeneic exosome therapies
- Legal and regulatory positioning of autologous exosome procedures
- Clinical indications and treatment planning
- Contraindications, adverse event management, and patient safety
- Documentation, consent, and professional responsibilities

Practical Part:

- Live trainer demonstration of the complete AutologIX workflow
- Supervised hands-on practice with venepuncture and PRP preparation
- Correct setup and operation of the AutologIX ultrafiltration system
- Safe handling and recovery of the final exosome concentrate
- Injection techniques adapted to aesthetic and trichology applications
- Post-treatment care and follow-up protocols

Training details:

- Duration: approx. 3 hours.
- Each participant receives a certificate and training presentation.
- You work on your own model.

Venepuncture for PRP/PRF

Module 1 – Introduction, Scope & Professional Practice
This module introduces venepuncture within aesthetic medicine and clarifies its distinction from phlebotomy. Learners will understand professional accountability, scope of practice, consent, documentation, and the importance of CPD.

Module 2 – Anatomy & Physiology for Venepuncture
This module covers the structure and function of the venous system. Key veins of the antecubital fossa (median cubital, cephalic, basilic) are explored. Learners will differentiate veins from arteries and understand nerve proximity to minimise injury.

Module 3 – Health, Safety & Infection Control
Topics include standard precautions, hand hygiene, PPE, skin antisepsis, bloodborne pathogens, needle components, needlestick injury management, cleaning of reusable equipment, and sharps disposal.

Module 4 – Equipment & Clinical Preparation
The module introduces venepuncture equipment used in aesthetic practice. Learners will understand the use of needles, butterfly systems, vacutainers, tourniquets, PRP/PRF tubes, and correct preparation of a clean clinical field.

Module 5 – Venepuncture Technique & Blood Processing
This module provides a step-by-step venepuncture technique. Learners will cover vein selection, tourniquet application, palpation, needle insertion, blood collection, haemostasis, and post-procedure care. Centrifugation principles and anticoagulant vs non-anticoagulant protocols for PRP and PRF are explained.

Module 6 – Consultation, Contraindications & Contra-actions
This module addresses consultation, informed consent, and client suitability. Contraindications such as poor veins, infection, oedema, and vascular conditions are identified. Contra-actions including haematoma, fainting, nerve contact, and arterial puncture are explained with management guidance.

Module 7 – Legal, Ethical & Regulatory Framework

Training details:

- Duration: approx. 3 hours.
- Each participant receives a certificate and presentation.
- You work on your own model.

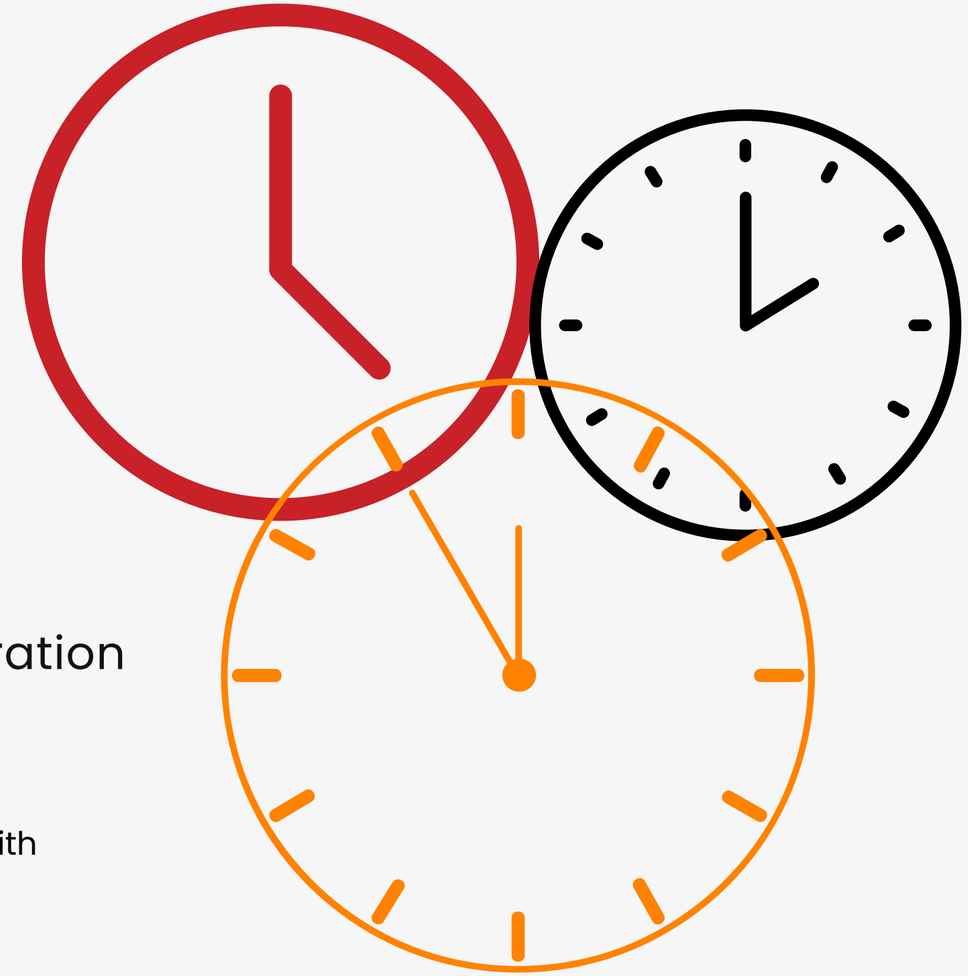
Our courses are conducted in small groups (max. 4-6 participants) to ensure individual attention and the highest quality learning experience.

The program is CPD Accredited and includes both an engaging lecture and practical hands-on training.

Trainees are encouraged to bring their own models. To master the products, explore all indications, and observe post-treatment outcomes, attending with at least two models is recommended.

TRAINIG TIMINGS

09:50-10:00 – Registration
10:00-10:15 - Company Presentation
10:15 -11:30 – Theoretical part
11:30-12:00 – Coffee Break
12:00-13:30 – Hands-on Training with Model 1
13:30-14:00 – Coffee Break
14:00 -15:30 – Hands-on Training with Model 2
15:30-16:00 – Distribution of certificates & celebration



During the demo, only the cost of the product is charged to the model, with no treatment fee applied. This exceptional opportunity allows models to experience premium treatments for just **50 GBP (PRP/PRF/Biofiller)** / **£175 (Autologous Exosomes).**

Trainings Offer

CPD MASTERCLASS TRAININGS

>>> £650

The training includes the following modules:

- Training Module 1:
PRP + PRF + BIOFILLER

- Training Module 2:
PRP + PRF + VENEPUNCTURE

- Training Module 3:
AUTOLOGOUS EXOSOMES

CPD-Accredited / Theoretical + Practical Training

VAT INCLUDED

AUTOLOGOUS STARTER PACK + TRAINING

>>> £1,999

*Spend at least the Starter Pack value on the listed autologous products and choose a **£650 value free CPD Masterclass Training** (PRP, PRF, autologous exosome kits; kit & tube only options, or device like centrifuge, plasma gel maker, etc.)*

CPD Accredited Training – Terms & Conditions

1. Registration, Payment & Eligibility

- Training registrations are non-refundable.
- CPD certificates will only be issued to participants who fully attend the training and complete full payment of the agreed training fee.
- If a participant is unable to attend, the registration may be transferred to another person subject to prior approval.
- By registering, participants confirm that they are over 18 years of age.
- The organiser reserves the right to refuse participation to individuals who are not actively working within the aesthetic, beauty, or healthcare industry, or otherwise professionally connected to the sector.

2. Postponement, Cancellation & Availability

- The training organiser reserves the right to postpone or reschedule the programme up to 2 days before the training date if deemed necessary. Participants will be informed accordingly.
- If the minimum number of participants is not reached, the training may be postponed to a later date. In such cases, an alternative training date will be offered and this alone shall not be considered sufficient grounds for a refund request.
- In cases of force majeure (including but not limited to natural disasters, pandemics, transportation disruptions, governmental restrictions, or circumstances beyond the organiser's reasonable control), the organiser reserves the right to postpone or cancel the programme. In such cases, participants will be offered an equivalent place on a rescheduled date and no refunds will be issued.
- Places are limited. Once the course is fully booked, registrations may be closed and a waiting list implemented.
- The organiser cannot be held responsible for travel, accommodation, flight cancellations, transfer costs, or similar personal expenses.

3. Hands-On Training & Model Requirements

- To ensure hands-on practical training, each participant is required to provide at least one model. Participants unable to provide a model must notify the organiser at least 7 days before the training date. Models will only be responsible for the cost of the products used during treatment.
- All models will be assessed by the trainer for suitability prior to treatment. If deemed unsuitable, the practical procedure may not be performed.
- Participants acknowledge that all practical procedures are performed in a training environment under trainer supervision.
- All participants are required to comply with hygiene, safety, and trainer instructions throughout the training programme.

4. Professional Responsibility & Post-Training Practice

- The training programme is intended for professional development and technical education purposes only. Completion of the course does not guarantee clinical success, business performance, employment opportunities, or financial income. Desired competency levels can only be achieved through continued practice, clinical experience, and ongoing professional development.
- The training provider's responsibility is limited to the preparation of the educational content, delivery of theoretical and practical training, organisation of the programme, and provision of reasonable post-training technical guidance.
- Any procedures performed by participants after the training, including clinical decisions, patient/model assessments, injection techniques, complication management, and treatment outcomes, remain entirely the responsibility of the practitioner.
- The training provider cannot be held liable for any direct or indirect outcomes resulting from participants' individual clinical applications.
- Where necessary, participants may seek additional professional consultation from independent experts recommended by the trainer or organisation.
- Participants are solely responsible for ensuring that they hold the appropriate legal permissions, professional qualifications, insurance coverage, and clinical authority required to perform aesthetic procedures in their respective countries or regions.

5. Conduct, Confidentiality & Intellectual Property

- No refunds will be issued to participants who arrive late or fail to attend without prior notice. Issuance of certificates in cases of late arrival remains at the organiser's discretion.
- The organiser reserves the right to remove any participant whose behaviour may negatively affect the training environment, commercial confidentiality, brand reputation, or the experience of other attendees. In such cases, no refund will be provided.
- The opinions expressed by trainers, speakers, or presenters are solely their own and do not necessarily represent the views of the organiser.
- By attending the training, participants agree that photographs and videos taken during the event may be used for educational, promotional, and social media purposes.
- The organiser reserves the right to take legal action in cases involving unauthorised recording, copying, distribution, sharing, or commercial use of training materials, presentations, videos, commercial information, or educational content.
- All educational materials, presentations, videos, and documents remain the intellectual property of the organiser and may not be copied, reproduced, distributed, or used for commercial purposes without prior written consent.
